

Ecodesign on the Textile Sector

Assignment

1. Units: 01 - 02 **Eroare! Marcaj în document nedefinit.**
2. Units: 03 - 04 2
3. Units: 05 - 06 - 07 **Eroare! Marcaj în document nedefinit.**
4. Units: 08 - 09 – 10..... **Eroare! Marcaj în document nedefinit.**

1. Units: 03 - 04

With these two units we are giving a first "skimming" to the expansive concept phase, although it may seem the furthest from the Eco-Design implementation phases, it is still fundamental and important aspects to be taken into consideration when entering the market.

Therefore it is advisable to consider them from the very early stages of definition in order to avoid running into obstacles once the product concept has been defined.

Identify, therefore, what are the salient aspects to take into consideration in the development (also future) of the concept, in terms of labelling and regulatory frameworks to be explored.
